ABOUT

As well as episodic scripted, I also cut super high turn-around TV features and theatrical features. I excel at high turnaround projects and first episodes that need me to find the tone. I'm known for my great use of music, soundscaping and sfx. All these, along with ADR ideas, I lift the project to a whole other level. I'm super versatile for any genres for all ages.

I believe sound and music is a crucial ingredient often overlooked by others. All this comes with a super dry British sense of humour. I'm an emotional guy and go with my first instinct when I go through dailies, what makes me laugh, excited, freaked out or cry goes in the cut.

I'm based in Toronto with my own edit suite and a full member of DGC & the British Film Editors (BFE). I was nominated for an Emmy by Disney Plus for Episode 7 of Fantasy Series "The Quest". References at bottom of CV.
